

**HYPERBARIC OXYGEN THERAPY AND SUPERVISION OF THE ADMINISTRATION
OF HYPERBARIC OXYGEN THERAPY (HBOT)**

1. Can a podiatrist supervise hyperbaric oxygen therapy?

No, it is not within the scope of practice of a podiatrist to supervise the administration of HBOT because the training and skills required to treat potential complications of the treatment are outside the scope of practice for podiatrists in Arizona.

It is appropriate for a podiatrist to order HBOT.
